STACK

Frontend

React, TypeScript, JavaScript, Tailwind, Vite

Backend

Python, FastAPI, Node.js, PHP, Java, C

Data and tools

SQLite, Git, Linux, REST APIs, Google Cloud

LANGUAGES

Portuguese (native)

English (fluent)

CERTIFICATION

Google Cloud Cybersecurity Certificate (2024)

Leonardo Santos

FULL-STACK & AI DEVELOPER

Computer engineering student from Portugal. I build full-stack web apps and AI systems, and right now I'm working on a route optimization algorithm at UBI's HULTIG research lab. I enjoy going from a rough idea to a working product that people can actually use.

EXPERIENCE

AI Developer

HULTIG Research Lab, University of Beira Interior · Sep 2024 to present

Building an AI algorithm for route optimization inside the university's NLP and AI research group.

Full-stack Developer, Internship

Celfinet (now Cyient), Lisbon · Jul to Sep 2024

Built full-stack web features over a summer internship, working on both the frontend and the backend.

EDUCATION

MSc in Computer Engineering

University of Beira Interior, Covilhã · **2nd year**, virtualisation and cybersecurity

Erasmus, Cracow University of Technology

Kraków, Poland · **Feb to Jun 2026**

Erasmus, Rzeszów University of Technology

Rzeszów, Poland, Computer Science · **Oct 2024 to Feb 2025**

BSc in Computer Science and Engineering

University of Beira Interior, Covilhã · **2021 to 2025**

WHAT I BUILD

Some of my recent side projects: a personal life manager I use every day (calendar, expenses, habits and notes), a trip planner with live flight search through the Amadeus API, and a film tracker with its own backend. All full-stack, mostly React on the front with Python and FastAPI behind.
